

Compliance

made easy.

## ADA-Compliant FlexPay™ EPP Retrofit for The Advantage® Dispensers

Gilbarco Veeder-Root offers the industry's only retrofit solution that meets compliance requirements for both the Americans with Disabilities Act (ADA) and the Payment Card Industry (PCI) requirements to continue accepting PIN-based debit at your Gilbarco® The Advantage dispensers.

It's the most cost-effective way to comply with both sets of requirements and still get the best PCI upgrade in the business with Gilbarco's FlexPay Encrypting PIN Pads (EPP).

## Easy to install

- > Retrofit uses the existing bolt pattern from our previous ADA-compliant keypad.

## Easy to use

- > Keypad is located within the height requirements of ADA to enable access by people with disabilities as well as typical users.

## Enables continued acceptance of PIN-based debit

- > The associated cost savings at your dispensers with our PCI-certified FlexPay Encrypting PIN Pad.

## The most cost-effective solution

- > Provides ADA and PCI EPP compliance at a reasonable cost, extending your ROI in The Advantage dispensers.

## The most flexible solution

- > Maintains two card readers and auxiliary keypads to help users of all heights swipe their cards and indicate payment method and location, such as "Pay Here Credit." All consumers use the Encrypting PIN Pad in the ADA location for PIN-based debit transactions.

## Superior quality and performance

- > Built into every ADA FlexPay EPP retrofit and they are supported by the industry's best warranty and most comprehensive network of Authorized Service Contractors.
