

## Encore<sup>®</sup> Ultra-Hi Flow Master and Satellite Dispensers

The truck stop environment requires rugged solutions that are both durable and reliable, because time is money to you and your customers.

Gilbarco Veeder-Root's Ultra-Hi flow masters and satellites for retail truck stops are made to last and they cut in half the amount of time it takes

to pump and pay. You can sell more fuel during busy periods and your customers get back on the road faster.

Pump up to 63 gpm\* combined flow rate when using a master and satellite simultaneously – with all the convenience of pay-at-pump. It's the fastest way to pump and pay!

Our Encore<sup>®</sup> S, Encore 300 and Legacy<sup>®</sup> models combine to offer the most rugged, economical and flexible choices for truck stop fueling.

\* Assumes 30 psi inlet pressure. Flow rate for master and satellite used separately is about 32 gpm each. Actual results may vary.

# The fastest way to pump and pay. - Encore® Ultra-Hi Flow Master and Satellite Dispensers

## Flexible choices

A variety of configurations from the Encore® S, Encore® 300 and Legacy product families are interoperable to provide many options for your fuel island layout. Pair one or two-sided masters with one or two-sided satellites. Or Combo dispensers (master on one side and a satellite on the other) provide a consistent look to your fuel island. You can also use Legacy satellites with Encore masters for an economical solution.

## POS & Back Office compatibility

Encore S and Encore 300 Ultra-Hi masters use Gilbarco® CRIND® card reader in dispenser for fast and secure payment at the forecourt. Gilbarco's standard dispenser interface is compatible with your Gilbarco Passport® point of sale system, as well as most third-party point of sale and back office systems.

## Easy, modular upgrades

Encore modular dispenser electronics make it easy to upgrade to new features in the future. Buy the features you need today and keep technology options open for the future as your business grows.
