

Horizon I End of Product Support

July 2022

Horizon

The Horizon Multi Product Dispenser has set the standard for narrow base Hanging Hose units in Australia since 2010 before being made end of life in Australia in 2020 as part of the natural cycle that drives technological evolution

The Horizon has reached the point in its life cycle where the manufacture of key spare parts is no longer feasible due to obsolete components and old production techniques. Whilst Gilbarco Veeder-Root will do all it can to support our customers, the availability of spare parts cannot be guaranteed beyond 31st March 2030.

The replacement is the Horizon II and is available for sale as our core Multi Product H Frame, narrow base offering.

New Horizon II

The Horizon II is an H-Frame Pump or Dispenser allowing up to 4 grades and incorporating all the latest global technology. This includes:

- Apollo state of the art electronics
- Electronic meter calibration
- Software flow control
- High visibility backlit LED lighting
- Vaportek II VR2
- Improved visibility of the forecourt
- Improved serviceability
- Option for High Definition Meters.

For Truck lanes, there is also a 4 Hose Ultra High Flow Truck Pump or Dispenser with a 2-hose single sided option for outside Truck lanes.

Important Notes

The Horizon II inlets are the same standard 250mm apart and the same height (2.4M) as both the Horizon I and the older Enterprise

Horizon II Dimensions are: H:2390 W:580 B:1200

Thank You

Gilbarco Veeder-Root is committed to providing the highest quality products and services to our customers. We wish to thank you for your highly valued business and hope to continue our relationship in the future.
