

Enterprise End of Product Support

31st December 2023

The Enterprise was replaced by the Horizon 1 and II

The Enterprise H frame range of Pumps and Dispensers set the standard for exceptional quality on forecourts for over 12 years before being made end of life in December 2010 as part of the natural cycle that drives technological evolution

The replacement in 2011 was the Horizon which has since been superseded by the Horizon II range of pumps and Dispensers released in 2018.

Gilbarco is confident that our customers loyal to Gilbarco H frame pumps and dispensers will be delighted with the functionality, reliability, versatility and features of the latest Horizon II platform

From Dec 2020, the Enterprise range of pumps and dispensers reached the point in their life cycle where the manufacture of spare parts was no longer feasible due to obsolete components and old production techniques

Whilst Gilbarco will endeavor to make spare parts available to support our customers, where a component ceases to be available, Gilbarco will not be obliged to accept orders for these parts. All spare parts cannot be guaranteed beyond 31st December 2023.

Consider upgrading your Dispensers

As December 2023 approaches, there will be an increase in demand for Horizon II pumps and dispensers to replace Enterprise units. To ensure there are no gaps in supply we would like to encourage customers to consider upgrading sooner and benefit from the advanced features of this range.

Features Available on the Horizon II range include:

- Advanced Apollo electronics platform
- Hi-visibility large digit LED lighting
- Software flow control
- Precision electronic meter calibration to 15.000L
- Magnetic nozzle switching
- Advanced High Definition meter option
- ZVA II hanging hardware
- Vaportek II VR II collection and Vaporix II monitoring
- Improved forecourt visibility
- Improved serviceability – standard global field proven components
- 2 or 4 hose UHF version in pump or dispenser

Important Notes

The Horizon II inlets are the same standard 250mm apart and the same height (2.4M) as the Enterprise, Horizon I, and older Lowline MK I to III

- Horizon II Dimensions are: H:2390 W:580 B:1200

Thank you

Gilbarco Veeder-Root is committed to providing the highest quality products and services to our customers. We wish to thank you for your highly valued business and hope to continue our relationship in the future.
