

FlexPay™ B2B WIDE

Outdoor Payment Terminal
(OPT)

- ✓ Best fit for full unmanned and fast lanes
- ✓ Modern and technological look and feel
- ✓ Extremely visible on the forecourt
- ✓ Unbeatable user experience

Payment Solutions

**GILBARCO
VEEDER-ROOT**

Designed for maximum profit generation

The unique FlexPay B2B WIDE was the first double-sided Outdoor Payment Terminal allowing payments by cash or cards to be made simultaneously on both sides of the terminal.

FlexPay B2B WIDE has been designed to support both attended and unattended sites permitting constant refuelling on both sides of a fast lane for maximum profitability around the clock.

Why FlexPay B2B WIDE?

A standalone double-sided OPT, the FlexPay B2B WIDE is the perfect solution for fast lane operations and unattended sites. Designed to extend sales operation and increase your profitability.

- Wide range of payment methods supported
- Integrated media advertisement for upselling and promotions in the shop

Maximum Flexibility

FlexPay B2B WIDE is highly configurable offering a wide range of options as factory fit or retrofit in field:

- Single or double side
- Hybrid manual or motorized card reader
- 2D barcode reader
- Contactless reader
- Different types of printers
- Security options for cards and cash
- Different models of cash acceptance with a choice of standard, sealing bag or stacker solution
- Small Board Computer (SBC)

Unbeatable User-Experience

FlexPay B2B WIDE features a user-friendly touch screen for ultimate speed and ease of use.

- Best-in class customer experience
- Widest choice of payment options for maximum convenience
- Improve customer loyalty
- Stay ahead of the competition

Unique Payment Platform

The FlexPay B2B WIDE features Gilbarco Veeder-Root's proprietary payment platform (SPOT M7).

- Best investment in the market
- Highest security
- Integrated multimedia capability

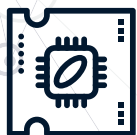

Key Characteristics

Highest security

Proprietary SPOT M7 payment platform technology offers maximum protection against anti-skimming devices and fraud.

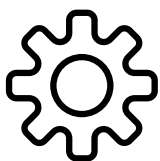

- ✓ Complies with the highest security level
- ✓ Meets the latest international bank security standards

Powerful PC Board

An option on the terminal communicates with POS/BOS/FCC to deliver a seamless customer experience:

- ✓ Control the OPT mode
- ✓ Send sales data to BOS database
- ✓ Send services, prices and information

Easy to install

Compact design to fit in small spaces.

- ✓ Flexible positioning. Can be orientated on any four sides
- ✓ Easy to upgrade and fit in place of older Gilbarco Veeder-Root terminals

Access Hierarchy

Set different access levels for different types of user or activity, for example paper roll changes, maintenance work and banknote withdrawals.
