

Gilbarco Veeder-Root **Encore**® 900 Series Dispenser

MAXIMIZE PROFITS DURING EVERY FILL-UP

The Encore 900

Engineered for fuel flexibility, lower costs and security

Finally — a dispenser that contributes more to your bottom line than just fuel sales. Communicate your brand's message. Enable quick, easy, secure and even contactless payments such as tap-to-pay or Apple Pay®. Communicate your message to your customers on the upgraded 15.6-inch touch screen or standard 10.4-inch color screen.

ENGAGE CONSUMERS WITH A 15.6-INCH TOUCH SCREEN

Your consumers use touch screens on their smartphones, tablets, and the dashboards of their cars and trucks. It's now a familiar way to buy products and make payments. So give consumers what they know and expect with the 15.6-inch touch screen available on the E900. A 10.4-inch, non-touch screen is also available.

OFFER GREATER FUEL FLEXIBILITY.

1

The E900 offers up to six fuel grades with up to four hoses — flexibility never before seen. A larger portfolio of fuel grades reduces customer wait times, provides more options at every dispenser, and maximizes utilization of each island.

The E900 is E25 compatible with the option to upgrade to Flex Fuels.

IMPROVE PROFITABILITY WITH PRECISION ENGINEERING.

2

Equipped with HD Meter, the E900 requires fewer calibrations leading to less fuel given away due to meter drift — saving up to \$4,000 annually per site.

The GVR Ergo™ nozzle, standard with E900 (where available), provides better flow rates and higher throughput per site than competitors.

LOWER YOUR COST OF OWNERSHIP.

3

E900 dispensers come equipped with Connected Warranty, which provides the ability for remote start, increasing uptime.

The 15.6-inch touch screen is made with chemically hardened glass that is vandalism, scratch and abuse-proof, saving on unexpected costs. The 10.4-inch screen comes with protectors to save you \$200 – \$300 per vandalism attack.

GVR Ergo nozzle (where available) provides twice the warranty others offer, reducing on-going cost.

PROTECT YOUR BUSINESS AND YOUR CONSUMERS.

4

The E900 is all about security. Not only does it deliver EMV payment security, but it is one of the most physically secure dispensers on the market. It has a hidden top hinge that prevents removal of the bezel and a latch at the bottom requiring technicians to secure the door, making it tough to pry the bezel open.

Additional security options are available and enhanced by the Insite360 platform.
